RELIEVE PAIN STIMULATE HEALING

THE BURDEN OF CHRONIC WOUNDS

THE FINANCIAL BURDEN OF WOUND CARE IS SUBSTANTIAL...

WHAT IS ELECTRICAL STIMULATION (EST)?

EST IS THE APPLICATION OF A SMALL ELECTRICAL CURRENT TO HUMAN TISSUE

EST is already widely used in clinical medicine:³

Examples include:

- Cochlear implants
- Pacemakers
- Spinal cord nerve stimulation

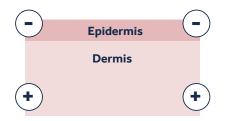

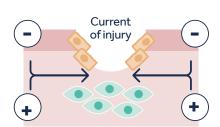

EST HAS ALSO
BEEN USED IN
SPECIALIST
WOUND CLINICS
FOR MANY
YEARS.

NORMAL WOUND HEALING RELIES ON A "CURRENT OF INJURY"4

Intact skin acts as a "battery."4

During normal wound healing, a "current of injury" helps to direct cell migration and proliferation from the wound edge into the centre of the wound.⁴

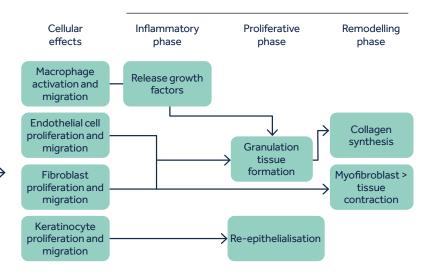

IN HARD-TO-HEAL WOUNDS.

THE CURRENT
OF INJURY MAY
BECOME
EXHAUSTED.³

WHEN EXTERNALLY
APPLIED TO HARD-TO-HEAL
WOUNDS, EST STIMULATES
MANY ASPECTS OF THE
HEALING PATHWAY³

ELECTRICAL STIMULATION

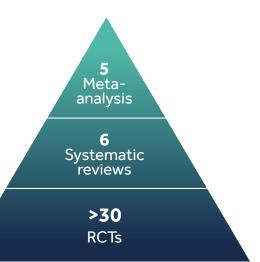

EST modulates events in the following phases of wound healing:

WHY USE EST?

IN CHRONIC WOUNDS, THERE IS STRONG EVIDENCE THAT EST CAN KICK-START THE HEALING PROCESS.

Electrical stimulation is one of the most evidence-based modalities in wound management today: ³

A META ANALYSIS
REPORTED THAT ON
AVERAGE, ADDING EST
TO STANDARD CARE
ALMOST DOUBLED
THE RATE OF HEALING
OVER A 4-WEEK
TREATMENT PERIOD.⁵

EST IS RECOGNISED
IN WOUND CARE
GUIDELINES AND
RECOMMENDATIONS 6,7

UP UNTIL NOW, EST HAS NOT BEEN AVAILABLE IN A FORMAT THAT MAKES IT EASY TO USE IN FRONTLINE CLINICAL PRACTICE. ACCEL-HEAL SOLO NOW MAKES THIS POSSIBLE 6,8,9

- Preprogrammed 12 days of therapy in one device.
- Simple to apply and easy to use.
- Available to use in the community.
- Can be used in conjunction with existing wound management dressing choices and compression therapy.

WHAT TO EXPECT WHEN USING ACCEL-HEAL

MARKED REDUCTION IN PAIN SEEN BY DAY 3-7 15,16,17 WOUNDS SHOW PROGRESS TOWARDS HEALING

12,13,14

FOLLOWING
DAYS AND WEEKS
WOUND CONTINUES
TO HEAL

HEALING

DAY 1
ACCEL-HEAL
APPLIED

DAY 12

ACCEL-HEAL

TREATMENT COMPLETED

APPLICATION IS SIMPLE

Everything required to use the device is within the therapy pack

A clip and strap is provided to support fastening and wearability.

Application Guide and 'How to Use' videos are available on the website.

Please refer to instructions for use before commencing therapy.

ACCEL-HEAL'S CLINICAL EVIDENCE

23 PUBLISHED ARTICLES INCLUDING 10 PAPERS AND 13 POSTERS, HAVE BEEN PUBLISHED

Including 2 double blind, placebo controlled RCTs:

...ARE INTOLERANT
OF WOUND
TREATMENTS
BECAUSE OF
WOUND PAIN

USERS OF ACCEL-HEAL SAY

"When I first put the device on I was in absolutely excruciating pain and I just didn't know what to do. I was taking painkillers – they weren't doing anything. And then the device went on and day after day after day it was getting that little bit better."

MRS F, PATIENT USING ACCEL-HEAL

"Once it started to heal, it's just been racing. Every time the district nurses take off the dressings, they look at it and say 'wow, we're almost there'. They can't believe the difference and I can't believe the difference. My sleep is fantastically different now that the ulcer has healed and that it is no longer painful. I've gone from having to go twice a week to have my leg dressed to once a week and that in itself is a blessing because I'm not so confined to having to go out and do things."

MRS J, PATIENT USING ACCEL-HEAL

"Her pain diminished and, within days, the wound started to shrink and it was just great to see mum getting back into life and being happy."

RELATIVE OF PATIENT USING ACCEL-HEAL

SUMMARY

THERE IS A WEALTH OF EVIDENCE THAT EST AND ACCEL-HEAL CAN BENEFIT HARD-TO-HEAL WOUNDS

These benefits include:

- Early relief of pain¹⁵⁻¹⁷
- Reduced inflammation¹⁰
- Stimulation of the healing process¹¹

This leads to improvements in:

- Patient mood^{16,17}
- Quality of life^{16,17}
- Mobility^{16,17}
- Tolerance of other gold standard treatments e.g. compression therapy¹⁸
