

ARE YOU OR YOUR LOVED ONE SUFFERING FROM A NON HEALING OR PAINFUL CHRONIC WOUND?

INTRODUCING ACCEL-HEAL SOLO

We know living with a chronic wound can be exhausting. It can affect every part of your life.

If your wound has stopped responding to current therapy or your pain can't be controlled with simple analgesics, a new therapy called Accel-Heal Solo may help.

Accel-Heal Solo is an innovative new alternative that can be used alongside current care, which stimulates healing and reduces pain. Helping to put you back on the road to recovery!

This clinically proven treatment is now available both via NHS prescription and private purchase, giving you more options to get the care you need.

WHAT IS ACCEL-HEAL SOLO?

Accel-Heal Solo is a small, wearable device delivering gentle, subsensory electrical stimulation therapy (EST). It works alongside your existing wound care routine to:

Restart healing in wounds that have stalled

Relieve wound pain, often within 2–3 days

Improve comfort and mobility

THE THERAPY LASTS 12 DAYS AND IS:

Easy to apply and use

Small, unobtrusive and comfortable to wear

Suitable for home use

HOW DOES IT WORK?

In simple terms, our skin and tissues naturally produce tiny electrical signals that help cells grow, move, and repair damage. It is like an internal messaging system that supports wound healing.

In chronic wounds, where healing has stalled, these natural signals can become disrupted. Electrical stimulation therapy helps restore this communication, effectively waking up the cells. This can reduce inflammation, improve blood flow, and kick start the body's natural healing process.

Scan here to visit our website and see it in action yourself.

HOW CAN I ACCESS ACCEL-HEAL SOLO?

THROUGH THE NHS

Accel-Heal Solo is available for clinical prescribing and may be accessible directly from your healthcare professional.

PRIVATE PURCHASE

(IF NHS ACCESS IS NOT AVAILABLE)

If Accel-Heal Solo is not available locally but considered suitable by your clinician, it can be purchased privately through our online pharmacy partner, EasyMedsHealth.com Pharmacy.

IS ACCEL-HEAL RIGHT FOR ME?

ACCEL-HEAL SOLO IS DESIGNED FOR PEOPLE WITH WOUNDS THAT:

Are not healing as expected despite current care

Are painful enough to affect walking, sleep, or daily life, which cannot be resolved with simple analgesics.

IT CAN BE USED FOR:

Diabetic foot ulcers (DFUs)

Venous leg ulcers (VLUs)

Pressure ulcers (PUs)

The device can be applied by a healthcare professional or by patients/carers with guidance and training.

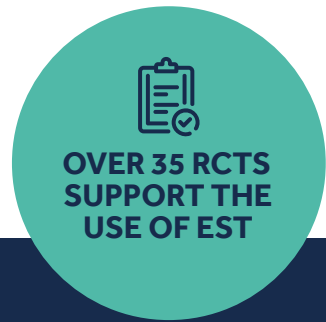

IMPORTANT SAFETY INFORMATION

Accel-Heal Solo should always be used under the direction and supervision of a qualified healthcare professional. Please read the instructions for use carefully, which are included in the pack.

WHAT DOES THE EVIDENCE SAY?

Electrical stimulation therapy (EST) for wound healing has been studied and recommended for over 30 years.

This means it's backed by strong scientific research, including:

RANDOMISED CONTROLLED TRIALS (RCTS):	SYSTEMATIC REVIEWS:	META-ANALYSES:	OVER 35 RCTS SUPPORT THE USE OF EST
These test treatments by comparing results between a group receiving the treatment and a group that doesn't.	These gather all high-quality studies on a topic, so we can understand the full picture.	These combine results from different studies to give clearer answers about how well a treatment works.	Accel-Heal Solo builds on this robust evidence and has been successfully used in real clinical settings for leg ulcers, diabetic foot ulcers, pressure injuries, and other wound types.

Results have shown:

	Faster healing		Sustained pain relief		Better outcomes
